Art Unit: ***

1. (Original) A method of conducting electronic commerce transactions among participants in an E-marketplace, comprising the steps of:
obtaining privacy-use information for each participant;
identifying collaborative groups of two or more participants who are presenting a collaborative transaction to the E-marketplace;
creating an aggregate privacy policy for each collaborative transaction, based on privacy-use information from each participant in each collaborative group; and
presenting to the E-marketplace the aggregate privacy policy for each collaborative transaction.

2. (Original) The method of claim 1, wherein said privacy information comprises a P3P policy.

3. (Original) The method of claim 1, wherein said step of obtaining privacy-use information for each participant comprises at least the steps of:
requesting each participant to submit said privacy-use information to the E-marketplace as part of a registration procedure for the E-marketplace; and
storing all of said submitted privacy-use information by the E-marketplace.

Art Unit: ***

4. (Original) The method of claim 1, wherein said step of obtaining privacy-use information for each participant comprises at least the step of:

requiring each participant to submit said privacy-use information to the E-marketplace as part of a registration procedure for the E-marketplace; and storing all of said submitted privacy-use information by the E-marketplace.

5. (Original) The method of claim 4, wherein said step of sharing the privacy-use information comprises at least the step of:

said E-marketplace making available all of said stored privacy-use information to all participants upon request.

6. (Original) The method of claim 4, wherein said step of sharing the privacy-use information comprises at least the step of:

said E-marketplace making available to participants in a particular transaction the stored privacy-use information of all participants in said particular transaction.

7. (Original) The method of claim 1, further comprising the step of:

creating an individual privacy policy for each non-collaborative transaction, based on privacy-use information from the individual participant in said non-collaborative transaction; and

Art Unit: ***

 pertaining to the E-marketplace the individual privacy policy for each non-collaborative transactions.

8. (Original) The method of claim 7, further comprising the steps of: displaying to a particular participant only information pertaining to transactions that have privacy policies corresponding to their privacy-use information.

9. (Original) A computer program product recorded on computer readable medium for conducting electronic commerce transactions among participants in an E-marketplace, comprising:
computer-readable means for obtaining privacy-use information for each participant;
computer-readable means for identifying collaborative groups of two or more participants who are presenting a collaborative transaction to the E-marketplace;
computer-readable means for creating an aggregate privacy policy for each collaborative transaction, based on privacy-use information from each participant in each collaborative group; and
computer-readable means for presenting to the E-marketplace the aggregate privacy policy for each collaborative transaction.

10. (Original) The program product of claim 9, wherein said privacy information comprises a PSP policy.

11. (Original) The program product of claim 9, wherein said computer-readable means for obtaining privacy-use information for each participant comprises:
computer-readable means for requesting each participant to submit said privacy-use information to the E-marketplace as part of a registration procedure for the E-marketplace; and
computer-readable means for storing all of said submitted privacy-use information by the E-marketplace.

12. (Original) The program product of claim 9, wherein said computer-readable means for obtaining privacy-use information for each participant comprises:
computer-readable means for requiring each participant to submit said privacy-use information to the E-marketplace as part of a registration procedure for the E-marketplace; and
computer-readable means for storing all of said submitted privacy-use information by the E-marketplace.

Art Unit: ***

13. (Original) The program product of claim 12, wherein said computer-readable means for sharing the privacy-use information comprises:

computer-readable means for making available via said E-marketplace all of said stored privacy-use information to all participants upon request.

14. (Original) The program product of claim 12, wherein said computer-readable means for sharing the privacy-use information comprises:

computer-readable means for making available to participants in a particular transaction, via said E-marketplace, the stored privacy-use information of all participants in said particular transaction.

15. (Original) The program product of claim 9, further comprising:

computer-readable means for creating an individual privacy policy for each non-collaborative transaction, based on privacy-use information from the individual participant in said non-collaborative transaction; and

computer-readable means for presenting to the E-marketplace the individual privacy policy for each non-collaborative transaction.

16. (Original) The program product of claim 15, further comprising:

computer-readable means for displaying to a particular participant only information pertaining to transactions that have privacy policies corresponding to their privacy-use information.

Art Unit: ***

WS

17. A computer program product recorded on computer readable medium for conducting electronic commerce transactions among participants in an E-marketplace, comprising:

computer-readable means for obtaining privacy-use information for each participant;

computer-readable means for identifying collaborative groups of two or more participants who are presenting a collaborative transaction to the E-marketplace;

computer-readable means for creating an aggregate privacy policy for each collaborative transaction, based on privacy-use information from each participant in each collaborative group; and

computer-readable means for presenting to the E-marketplace the aggregate privacy policy for each collaborative transaction.

18. The program product of claim 17, wherein said privacy information comprises a P3P policy.

WS

19. The program product of claim 17, wherein said computer-readable means for obtaining privacy-use information for each participant comprises:

computer-readable means for requesting each participant to submit said privacy-use information to the E-marketplace as part of a registration procedure for the E-marketplace; and

computer-readable means for storing all of said submitted privacy-use information by the E-marketplace.

20. The program product of claim 17, wherein said computer-readable means for obtaining privacy-use information for each participant comprises:

computer-readable means for requiring each participant to submit said privacy-use information to the E-marketplace as part of a registration procedure for the E-marketplace; and

computer-readable means for storing all of said submitted privacy-use information by the E-marketplace.

21. The program product of claim 20, wherein said computer-readable means for sharing the privacy-use information comprises:

Art Unit: ***

computer-readable means for making available via said E-marketplace all of said
stored privacy-use information to all participants upon request.

22. The program product of claim 20, wherein said computer-readable means for
sharing the privacy-use information comprises:

computer-readable means for making available to participants in a particular
transaction, via said E-marketplace, the stored privacy-use information of
all participants in said particular transaction.

23. The program product of claim 17, further comprising:

computer-readable means for creating an individual privacy policy for each
non-collaborative transaction, based on privacy-use information from the
individual participant in said non-collaborative transaction; and
computer-readable means for presenting to the E-marketplace the individual
privacy policy for each non-collaborative transaction.

24. The program product of claim 23, further comprising:

computer-readable means for displaying to a particular participant only information
pertaining to transactions that have privacy policies corresponding to their
privacy-use information.
